

UNITRON®

ASTRONOMICAL OBSERVATION BINOCULARS

"SPECIAL EDITION" WATERPROOF-FOG PROOF

Unitron deep sky observation binoculars offer the most advanced features available. Their nitrogen purged waterproof construction, make them safe to use even in the most inclement weather. The Bak4 prisms, fully coated lenses are polished to the same exacting standards as our refracting telescopes. Dual focusing oculars, contoured eyecups, special retractable rubber hoods on the objective barrels and a special tripod adaptor are all standard.
